

## Charles Hobson MD MHA Phd, FACS FCCM

Charles Hobson, MD is a surgeon and intensivist, and clinical and health services scientist. He began working with the Brandeis team developing PACES in 2014 and helped develop the clinical logic for the grouper. He helped build the joint Brandeis/American College of Surgeons advanced Alternative Payment Methodology proposal, powered by PACES, that was approved for development by CMS. Dr. Hobson has practiced family medicine in rural Washington State and emergency medicine in rural Virginia, served as medical director for a 2000 inmate maximum-security prison, and established and ran the Emergency Medicine Program for the International Medical Corps in Zenica, Republic of Bosnia and Hercegovina during the war there. He loves cooking with his wife, bodysurfing and fishing with his two young sons, and listening to loud electric guitars.
